

Missouri State Energy Planning (MoSEP) Process

Craig Redmon
Director, Division of Energy
Missouri Department of Natural Resources

Midwest Energy Solutions Conference
Plenary: “A Year of Action in State EE Policy”
Feb. 2, 2022

About the Division of Energy (DE)

- Missouri's State Energy Office
- Focus: affordable, reliable, Missouri-made energy
- Primarily funded through:
 - USDOE (State Energy Program and Weatherization)
 - Energy Loan Program earnings
 - State LIHEAP allocation (for Weatherization)

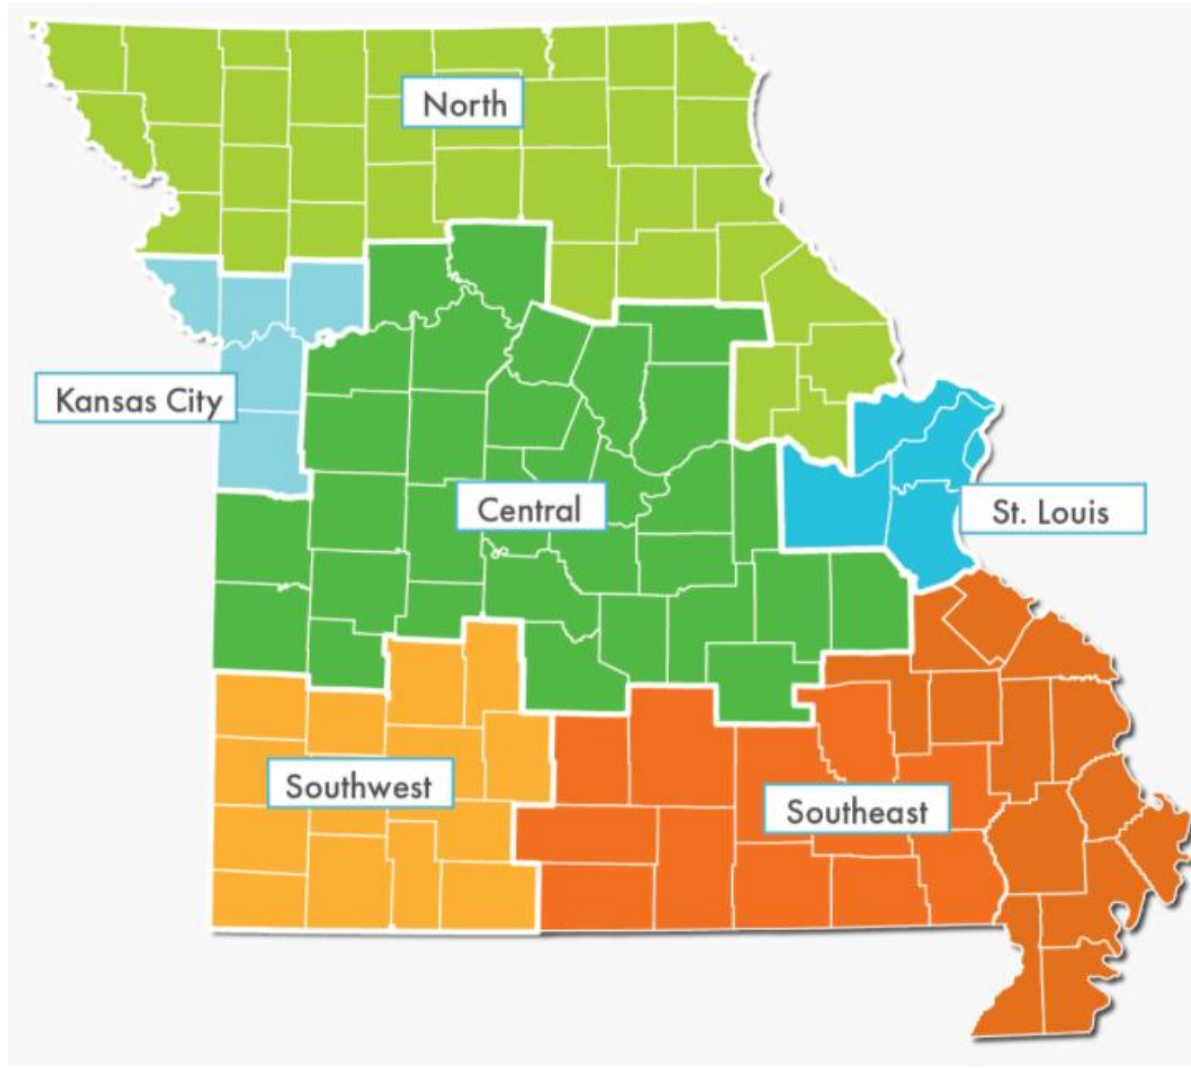

More About DE

- Main activities:
 - Energy Loan Program
 - Weatherization Assistance Program
 - State Energy Planning
 - State Fleet Reporting/State Building Efficiency
 - Energy Efficiency Education and Outreach
 - Renewable Energy Standard Facility Certification
 - Serve Citizen, Stakeholder, and Policymaker Inquires

MoSEP Process Vision

- Identify and address topics critical to Missouri's current and future energy needs through an ongoing series of stakeholder engagement workshops
- Regionally focused initiatives unified by state-level core values
- Metrics to measure success
- Recurring work and engagement to address additional initiatives

Department of Economic Development Regional Engagement Map

MoSEP Process Core Values

- Assure secure, reliable and resilient energy infrastructure and supplies.
- Enhance Missouri's competitive position in business retention, expansion and attraction through affordable rates and renewable energy options.
- Develop diverse in-state energy resources.
- Create opportunities for energy-related technological innovation and workforce development.
- Ensure affordability and equity in access to energy resources, services and programs.
- Promote the efficient and environmentally sound use of energy.

MoSEP Process Timeline and Progress

- *Missouri Energy Data and Trends* document to update information on state energy landscape
- Interactive, automatically updated online data:
 - Energy Data Dashboard
 - Missouri Energy Bulletin Data Tool
- Kickoff workshop for MoSEP Process to gather stakeholder input (October 2020)
- First Summary and Action Report outlining process kickoff and next steps (May 2021)

MoSEP Process Timeline and Progress (Continued)

- ***At least*** three rounds of regional meetings
 - First round (completed September 2021): facilitated discussion of potential regional initiatives
 - Second round (completed December 2021): further refine initiatives, identify metrics to track initiative progress, identify champions
 - Third round: finalize initiative plans and metrics, identification of next steps by stakeholders, review draft regional Summary and Action Report
- Small groups will work on details in-between meetings
- Statewide wrap-up: share progress
 - Present statewide Summary and Action Report

What is an “Initiative?”

- Any work, effort, process, or project that contributes toward the advancement, achievement, or support of any of the six MoSEP core values
- Regionally relevant, consensus-based (to greatest extent possible), actionable, time-bound, measureable

Energy Efficiency in the MoSEP Process

- Energy efficiency key to many core values
 - Often a low-cost way to meet energy goals, including affordability, reliability, resilience, resource planning
- Tentative efficiency-related initiatives for Cycle 1:
 - Weatherization Outreach and Workforce Development
 - Commercial Building Energy Efficiency Education
 - Industrial Assessment Center Outreach, Education, and Awareness
 - Statewide Leading Practices Exchange
 - Residential Energy Efficiency Real Estate Valuation/Multiple Listing Service
