

# Educating on heat pumps: Focus on Contractors

#### 2023 Midwest Energy Solutions Conference

Justin Margolies | Slipstream

February 2, 2023

## Climate + Clean Energy Solutions for everyone.

The knowledge, people, and resources to solve our biggest energy challenges.

#### Education can help us responsibly accelerate ASHP adoption

Why is education especially important now?

#### In empowering contractors:

- Who needs education and on what?
- What roles do utilities and statewide programs play?

#### Identifying top ASHP opportunities in Wisconsin

#### **Top 5 ASHP Opportunities**

- Single family AC replacement/natural gas dual fuel
- Single family propane displacement
- Multifamily with electric resistance heat
- Single-family all-electric new construction
- Multifamily all-electric new construction

#### Midwest opportunity for dual fuel heat pumps

#### **Scale of Opportunity**

 76% of Midwestern homes use natural gas or propane and 83% use a furnace as their main heating equipment

#### **Multiple Beneficiaries**

 Dual fuel heat pumps offer benefits to utilities, distributors, contractors, and customers

#### **Types of dual fuel/hybrid heat pumps**

	Single or two speed system	Modern-inverter system	Standalone add-on inverter system	Multizone Inverter system	
Gas furnace	Basic	Modern, communicating	Basic, non-specific	Modern, communicating	
Typical control types	24V thermostat with outdoor temp sensor	Full digital communication	24V thermostat with outdoor temp sensor	Full digital communication	
Model examples	Available from all manufacturers	Top-tier from all manufacturers	<ul> <li>Bosch IDS</li> <li>Gree Flexx</li> <li>Mitsubishi Intelliheat</li> </ul>	<ul> <li>Daikin VRV LIFE</li> <li>Carrier/Bryant Crossover</li> <li>Mitsubishi Intelli-heat</li> </ul>	
Relative Cost	Low	Moderate to High	Moderate	Moderate to High	
Cold-climate potential performance	No	Yes	Yes	Yes	

#### **Providing Michigan Contractors Proof**

Site	ASHP Compressor Speeds	Incremental cost	Propane reduction	Simple payback	Lockout (°F)
6	Variable	\$2,000	43%	7 years	28
8	One	\$600	63%	1 year	25
Avg		\$2,000	53%	4 years

#### **Utility contractor training and education**

- Grounded in research
- Responsive to market needs
- Leverage distributor and manufacturer
   partnerships
- Flexibility and creativity in training delivery

## Primary utility training target audience includes the equipment specifier

#### **HVAC Contractors Key Staff Roles**

- -Owners
- -Sales (i.e. comfort advisors)
- -Installing technicians
- -Front office administrative staff

"A selling technician represents less than 20% of all technicians" ~Manufacturer

#### **Example from ComEd: Needs Assessment to Training**

Barriers identified by the needs assessment Training interventions from our plan to address barriers

### 2022 Example from ComEd

 Baseline annual cost less projected annual cost = yearly savings

- New equipment cost = equipment + labor - midstream incentive - tax credit
- Payback in years = new equipment cost/yearly savings
- Example:
- Yearly savings = 3,930-2,400 = 1,530
- Equipment cost = \$8,000 1,400 500 = \$6,100
- Payback = 6,100/1,530 = 4 years!

#### **Connecting Customers and Contractors**

- Premise: customers need guidance on which contractors to contact who have experience, proficiency, and confidence in the technology
- The main goals of a designation are to:
  - Capture early heat pump adopters
  - Generate customer confidence in contractors

#### **Midwest ASHP Collaborative**

#### Accelerating ASHP adoption faster and better, together

- Funded by Pacific Northwest National Laboratory (PNNL)
- Delivered by CEE and Slipstream
  - In partnership with **MEEA** and **Elevate**
- Objectives:
  - Cross pollinating program best practices
  - Rate design for heat pumps
  - Workforce development
  - Regional market transformation strategy

#### Number of SFH per state

#### Thank you!
